PROFESSIONAL SUMMARY

I'm a fresh **Computer Science graduate** with a strong foundation in **full-stack web development**, the **MERN stack**, and **software engineering principles**. I understand how modern web applications are designed, built, and delivered, and how their different layers connect, from user interfaces and API communication to data handling and deployment. I approach problems analytically, pay attention to detail, and focus on building solutions that are structured, functional, and reliable. I'm currently seeking an **internship or entry-level role** in **full-stack web development** or **software engineering** where I can apply my foundational knowledge, contribute to real development work, grow professionally, and become a valued member of a collaborative development team.

SKILLS

- **Languages:** HTML5, CSS3, JavaScript (ES6), TypeScript, Python (Basics)
- **Frontend:** React.js, Next.js, Tailwind CSS, Responsive Design, Component-Based Architecture, State Management (React Hooks, Context API, Redux Toolkit), Client-Side Rendering (CSR), Server-Side Rendering (SSR)
- **Backend:** Node.js, Express.js, RESTful APIs Integration, JWT Authentication, Middleware, Error Handling,
- **Databases:** MongoDB (Mongoose), SQL, PostgreSQL (Prisma), Schema Design, Database Migrations.
- **DevOps & Tools:** Git, GitHub, Vercel, Render, Postman, AI Tooling, VS Code.

WORK EXPERIENCE

FullStack Web Development Intern | Anees Software House, Timergara KPK

May 2024 – Aug 2025

- Built a strong foundation in web development and responsive design within a professional MERN Stack environment.
- Built responsive, cross-device web interfaces using React.js, improving user experience across multiple screen sizes.
- Designed & implemented RESTful API endpoints with Node.js and Express.js, handling client-server communication.
- Created database schemas and wrote optimized queries for MongoDB and SQL to ensure fast data retrieval.
- Debugged and resolved frontend and backend issues, contributing to application stability and performance.
- Participated in daily standups and code reviews, learning professional development workflows and agile practices.
- Assisted senior developers with development tasks, testing, debugging, and code improvement activities.
- Practiced clean coding principles while strengthening problem-solving and analytical thinking abilities.
- Gained hands-on experience with Git, teamwork, version control, and real-world software development workflows.

Data Analytics Intern | Systems Limited — Islamabad

Sep-2025 – Dec-2025

- Learned the basics of databases, data warehousing, and data pipelines in a professional enterprise environment.
- Performed SQL querying, data transformation, and basic Python scripting for structured data processing tasks.
- Assisted in building data ingestion pipelines using Apache NiFi and processing data in Databricks.
- Conducted exploratory data analysis to identify trends, missing values, and data quality issues across datasets.
- Collaborated with team members on small data tasks, learning workflows, documentation, and reporting practices.
- Strengthened analytical thinking and gained exposure to enterprise data engineering and analytics practices.

FREELANCE/SELF-PRACTICED PROJECTS

1. AcademiaHub | AI-Powered Multi-Tenant SaaS Education Platform (Ongoing)

[Live Link](#)

- Building an enterprise-grade multi-tenant SaaS education platform with AI integration, secure tenant isolation, role-based access control, and scalable architecture using Next.js, NestJS, PostgreSQL, Prisma, and RESTful APIs.

2. MyCounsel | AI-Powered Enterprise Legal Research Platform

[Live Link](#)

- Developed an AI-powered legal SaaS platform featuring AI Legal Chat, Case & Statute Search, Petition Drafting, Document Analysis, and Judge Analytics using Next.js, TypeScript, Tailwind CSS, Firebase Auth, Zustand, and Stripe.

3. **Khan Brothers Engineering & Solutions | Company Website** | Client Side: [Live Link](#) | Admin-Panel: [Live Link](#)
 - Built a full-stack responsive corporate website using Next.js, Tailwind CSS, Express.js, and GraphQL (Apollo Server), with a custom admin panel for dynamic content management of services, projects, and company information.
4. **VoltStore | Full-Stack E-Commerce Platform | MERN Stack | Public Website & Admin Dashboard** [Live Link](#)
 - Built a complete e-commerce platform using the MERN Stack with a responsive storefront, secure checkout, and admin dashboard for inventory, orders, and user management.
5. **Timergara Doctors Hospital Management System | Public Website & Admin Dashboard** [Live Link](#)
 - Developed a full-stack hospital management system using Next.js, Tailwind CSS, Express.js, PostgreSQL, and JWT, featuring a responsive public website, secure admin dashboard, appointment management.
6. **Final Year Project: College Management System | MERN Stack & Next.js Web Application** [Live Link](#)
 - Developed a full-stack academic platform with role-based dashboards for admins, teachers, students, and parents. Included features for class management, assignments, attendance, exams, results and fee management.
7. **Online Garments Store | E-Commerce Web Application | Public Website & Admin Dashboard** [Live Link](#)
 - Built a modern e-commerce platform using Next.js, Redux, Express.js, and PostgreSQL, with a responsive storefront, product catalog, shopping cart, and secure admin dashboard for managing products, orders, users, and inventory.
8. **Pulse Social Application | Modern Social Media Platform | MERN Stack** [Live Link](#)
 - Built a dynamic social networking platform using the MERN Stack with user profiles, posts, likes, comments, follow system, and real-time engagement features for seamless media sharing and high user interaction.
9. **My Personal Portfolio Website & Professional Hub | Next.js Developer Brand Platform** [Live Link](#)
 - Developed a scalable portfolio platform using Next.js, Tailwind CSS, and modern UI libraries, featuring project showcases, skills, experience, certifications, contact integration, SEO optimization, and production deployment.

CERTIFICATIONS & TRAINING

Web Development

1. Full-Stack Web Development – Apna College – (MERN + Deployment) [Live Link](#)
2. Full-Stack Web Development – SimpliLearn – (MERN + SQL + Version Control) [Live Link](#)
3. Frontend Web Development – SimpliLearn – (HTML, CSS, JavaScript, React) [Live Link](#)
4. Introduction to MERN Stack – SimpliLearn – (MongoDB, Express.js, React, & Node.js fundamentals.) [Live Link](#)

Data Analytics & Engineering

1. Data Analytics Internship – Systems Limited – (Databases, SQL, Python, NiFi, Databricks) [Live Link](#)
2. Data Analytics Foundations – Coursera – (Fundamentals, data types, and data lifecycle.) [Live Link](#)
3. Advanced Data Analytics – Coursera – (SQL, Data Cleaning, Analysis and Visualization) [Live Link](#)

Other

1. Crash Course on Python – Coursera – (Fundamentals, data structures, & programming concepts.) [Live Link](#)
2. Certificate of Appreciation – MedGalaxy – (Public speaking and communication skills.) [Live Link](#)

EDUCATION

University of Malakand (UOM) | Bachelor of Science in Computer Science (BSCS – 4 Years)

- CGPA: 3.5
- Session: Oct 2021 – Aug 2025
- **Relevant Coursework:** Data Structures & Algorithms, Object Oriented Programming, Database Systems, Web Development, Software Engineering, Artificial Intelligence, Operating Systems, Computer Networks.

LANGUAGE

- English, Urdu, Pashto
